

Queen Elizabeth High School
PHYSICS
Year 9 Assessment Criteria

Working Towards	<p>Can define some of the key terms in the topic.</p> <p>Can complete simple calculations when given the formula.</p> <p>Can recall most of the energy stores.</p> <p>Can recall some energy resources.</p> <p>Can recall the law of conservation of energy.</p>
Expected Standard	<p>As above plus:</p> <p>Can define most of the key terms in the topic.</p> <p>Can construct graphs for categoric data.</p> <p>Can describe energy store changes.</p> <p>Can apply ideas of efficiency.</p> <p>Can recall pro's and con's of renewable and non-renewable energy sources.</p> <p>Can solve equations without rearranging.</p> <p>Can convert into standard units.</p>
Greater Depth	<p>As above plus:</p> <p>Can calculate energy stores.</p> <p>Can draw conclusions, identify patterns and complete calculations from data presented in a table or a graph.</p> <p>Can compare and contrast presented data.</p>
