

Year 11 Drama – Written Mock Update

Students recently completed their written mock exam, which focused on *Part A (DNA)*. For this mock, students answered 3 out of the 5 questions - roughly one third of the full written paper. This structure reflects the fact that we have not yet completed all of the written theory content, as recent lessons have focused on preparing for and completing the practical exams.

As a result, the current mock data should be viewed as a partial indicator of performance rather than a full reflection of students' ability across the entire written paper. Predicted grades may therefore look different to current mock percentages, as they take into account expected progress, remaining content to be taught, and students' practical outcomes.

The second written mock will cover the full paper and will provide a more accurate picture of likely performance in the final written exam in May.
